Sold by weight not by volume.

VETERINARIAN FORMULATED | WITH GLOBALLY SOURCED INGREDIENTS

# MILK REPLACEMENT

Enriched with Colostrum

NUTRITIONAL FOOD SUPPLEMENT FOR CATS

NET WT 12 OZ (340 GRAM)

Veterinarian formulated nutritional supplement is recommend for kittens, pregnant, lactating, elderly or recovering cats.

**MIXING DIRECTIONS:** Stir one (1) part powder into two (2) parts warm water (a tablespoon scoop is included). Mix until powder is completely dissolved. Do NOT mix in blender. Do NOT feed if formula is warmer than room or body temperature. Do NOT mix more than can be consumed in 24 hours.

**DIRECTIONS FOR USE:** Feed kittens two (2) tablespoons (30 ml) of liquid formula per four (4) oz of body weight. The kitten's needs will vary and this amount may be increased or decreased depending on the kitten. Small or weak kittens may need to be fed every three (3) to four (4) hours. Weigh kitten daily to ensure adequate feeding. For growing post-weaned kittens, show cats, elderly and recovering cats, feed one (1) tablespoon (15 ml) of liquid formula per five pounds of body weight. Liquid can be rewarmed to room or body temperature (Do NOT use microwave). Individual results may vary.

*All kittens should receive mother's milk for at least two (2) days if possible. The mother's milk gives extra nutrition and temporary immunity against some diseases.*

**PREGNANT AND LACTATING CATS:** Mix two (2) teaspoons powder for 5 lbs. of body weight until two (2) weeks after queening.

If kitten develops diarrhea, does not gain weight, cries constantly, or becomes lethargic, consult your veterinarian. For animal use only. **Keep out of reach of children and animals.**

Do not use if product appears to be tampered with or seal is broken. Store product in cool, dry place. Avoid temperatures above 86° F.
