PLACE ROCKS IN WATER BOWL
TO KEEP YOUR LAWN GREEN

NET WT .44 LBS (200 G)

POTTY ROCKS

PLACEZ LES ROCHES DANS UN BOL D'EAU
POUR GARDER VOTRE PELOUSE VERTE

Recommended to eliminate urine burn. Potty Rocks do not alter the pH levels in your dog's urine. It is safe for all pets that might share the same water bowl. Potty Rocks may vary in size as they are naturally occurring.

INGREDIENTS: Naturally occurring Paramagnetic Igneous rock.

DIRECTIONS FOR USE: Place potty rocks in dog's water bowl. Rocks will filter out some of the impurities that cause your grass to turn brown, like metals and nitrates. After use, the lawn will have a natural green look without the dead spots.

FOR BEST RESULTS: Replace your dog's drinking water daily. Replace your Potty Rocks every couple months. Attempt to make the dog bowl the only source of drinking water for your pet. Feed a premium dry dog food and avoid table scraps and raw meats.
